**Miami 2025 Preview: SIONYX Nightwave
Digital Night Vision Camera
Booth MB3346, Electronics Pavilion**

GUILFORD, CONNECTICUT – Represented by Ocean Marketing, SIONYX will be on deck in Electronics Pavilion booth MB3346 inside the Miami Beach Convention Center at the Discover Boating™ Miami International Show® next week with the best-selling Nightwave® marine color digital night vision camera.

Nightwave is built around SIONYX's patented Black Silicon CMOS sensor that offers unparalleled <1 millilux moonless starlight sensitivity. This advanced technology displays high-resolution color images and videos with exceptional clarity, allowing boaters to experience heightened visual acuity at night.

Unlike thermal imaging, which relies on temperature gradients to create images, digital night vision employs state-of-the-art sensors and advanced image processing algorithms to capture detailed and vibrant visuals, showcasing an impressive level of color accuracy, contrast, and depth perception. By providing a true-to-life representation of the scene, Nightwave offers superior object recognition capabilities in the darkness of night. With Nightwave, mariners of all levels can spot obstacles and debris in moonless starlight without white light or expensive thermal cameras.

For more information, visit booth MB3346 at DBMIBS, email Ocean Marketing, info@oceanmark.com or in the US call 1+800.343.8294.
