## **Spring Product Spotlight: SIONYX® Nightwave™ Ultra Low Light Marine Camera**

GUILFORD, CONNECTICUT – Represented by Ocean Marketing, the SIONYX® Nightwave™ Ultra Low Light Marine Camera is built around SIONYX's patented Black Silicon BSI CMOS sensor. It allows all levels of mariners to easily spot obstacles and debris in moonless starlight without white light or expensive thermal cameras – navigating safely, avoiding collisions, and maximizing time on the water.

Featuring <1 millilux moonless starlight sensitivity, with Nightwave you will see well beyond human eyesight and detect man-sized objects at 150 meters. The 44° field of view increases situational awareness so you can spot unexpected markers, vessels, land formations and more. IP67 rated, submersible to 3 ft for 30 minutes, you can safely use Nightwave in inclement weather conditions.

With flexible mounting options and easy setup, Nightwave can seamlessly integrate with major brand MFDs via the analog video output, displaying clear color digital night vision. Available in white as shown here, black or gray. For more information, visit <https://www.sionyx.com/products/nightwave>.

Distributors and dealers interested in the SIONYX Nightwave Marine Camera and other SIONYX products should contact Ocean Marketing, [info@oceanmark.com](mailto:info@oceanmark.com) or call 1+800.343.8294.
