Miami 2025 Preview: Steiner 7x50c Commander Binoculars With Compass Booths MB6049 & MB6065

STEINER 

GUILFORD, CONNECTICUT – Represented by Ocean Marketing, the Steiner Optics 7x50c Commander Binoculars with Compass will be featured in El Capitan booths MB6049 & MB6065 in the Miami Beach Convention Center at the Discover Boating™ Miami International Show® next week.

With antireflection, high-definition lenses delivering sharp, clear images by day or night, 7x50c Commander Marine Binoculars feature an open-bridge design which makes the binoculars easy to grip, and foldable winged eyecups to keep lateral light out of the eyes. For extra protection against dirt, oil, and water, the objectives and oculars are treated with a hydrophobic coating that resists scratches and makes cleaning the lenses easier without residue.

The lightweight, impact-resistant chassis is oil, petroleum, and chemical resistant. The fog-resistant optical tubes are waterproof to a depth of 33 feet. In-view compass bearings and reticle allow the user to take readings without taking eyes away from the image. For more information, visit booths MB6049 and MB6065 in the Miami Beach Convention Center, email Ocean Marketing info@oceanmark.com, or in the US call 1+800.343.8294.
