**See Quick & Easy to Install
WBV Shock Mitigation Units
At IBEX Booth 3-1439, October 3-5
Improve Ride Quality & Comfort Onboard**

GUILFORD, CT (USA) - WBV shock mitigation units will be on display in the Ocean Marketing booth (3-1439) at IBEX 2023, October 3-5 at the Tampa Convention Center.

WBV offers 3 distinct ranges of shock mitigating products so that you can improve the ride quality and comfort onboard boats no matter what the budget or seating configuration is.

WBV's CPR Series are the lightest & most compact units in the market. The P Series bolts directly to a standard pedestal and leisure chair to make new or retrofit installations quick and easy. The bolt pattern has slots and will fit almost any chair. The units can also be bolted straight to a GRP base or box. The C Series is designed for larger helm and captains chairs or race boat bucket seats.

WBV's new LT (Long Travel) Series is the most technologically advanced marine suspension seat available, using the highest specification US manufactured FOX Factory triple chamber shock absorber. The LT series is the choice of champions. Used by Americas Cup challenger, The New York Yacht Clubs "American Magic".

WBV will also debut its new OMEGA shock mitigating seat insert at IBEX 2023. OMEGA fits within any size/shape of seat cushion to reduce shock and vibration. Options start from as little as \$95.

For more information about WBV shock mitigation units, visit booth 3-1439 at IBEX 2023 or <https://www.shock-wbv.com>.
