**IBEX PREVIEW: WBV Shock Mitigation Units
Booth 3-1719, October 1-3
Easily Improve Ride Quality & Comfort**

GUILFORD, CT (USA) – The full range of WBV shock mitigation units, including the new P Series V2 and the new C Series V2, will be on display in the Ocean Marketing booth (3-1719) at IBEX 2024, October 1-3 at the Tampa Convention Center.

WBV shock mitigating products improve the ride quality and comfort on board boats, no matter what the budget or seating configuration is.

The new P Series V2 is a compact shock mitigation unit that can easily be installed onto a standard pedestal. The new C series V2, an upgraded version of the market-leading C series unit, is designed to take larger helm chairs. The new V2 version of the C series has the ability to take the new WBV 360° swivel & fore/aft seat slider.

The C & P units will be joined by the LT series (long travel), the halo product in the offering from WBV. Using the most technologically advanced shock absorber used on a marine suspension seat, the LT's shock absorber is manufactured by FOX Factory, known globally for making the best shock absorbers in the bike and ATV markets.

WBV's worldwide patented "OMEGA" shock mitigating seat insert will also be on display at IBEX 2024. OMEGA can be fitted within any seat cushion to help reduce shock and vibration caused by wave impacts.

For more information about WBV shock mitigation units, visit booth 3-1719 at IBEX 2024 or <https://www.shock-wbv.com>.
